Name of Invention: Designer tracheostomy tube attachment

This correspondence is intended to reply to the office action summary received. This is in reply to the missing claims. Claim number 5 is not missing, I was told by my patent examiner to remove this claim earlier on in this confusing process.

I was told that claim 5, along with the other claim numbers which were removed as you can see in earlier correspondence, were related to species 2. What you all referred to as species 2 was the adjustable part of my invention. I was told that I had to choose one or the other, which I felt that was not right. I am beginning to question that now. Sometimes I feel you need to talk to the inventors to understand the inventions, just as we have to call the 800 numbers for products we buy instead of just throwing them in the trash after we have invested so much into them just because we don't understand them or we "think" we do.

It seems that there are instructions given to me and when I comply with those instructions, I get notice once again, that there was a problem with those instructions. I would like to get my patent approved. It has been 4 years now. I am available to be spoken with because obviously the paper is not doing my patent any justice. I am being told to remove things, then years later told that very same thing is missing. Let's get this fixed and approved.

I am requesting that a combination of the attachment and the tracheostomy tube be made. The invention is strictly to be utilized in combination with the tracheostomy tube. The invention cannot be used without the tracheostomy tube therefore I request it be in combination with the tracheostomy tube.
